 KAISER PERMANENTE®

The choice to bring a new baby into your life is an exciting one – and we're proud to support you on your journey.

You're unique, and so is your fertility journey. If you need support and guidance as you build your family, we're here to help.

Our dedicated doctors and specialists can support you with compassionate, personalized care every step of the way. With fertility treatments like in vitro fertilization (IVF), intrauterine insemination (IUI), fertility preservation, and more, we use advanced techniques to make sure you're getting the high-quality care you deserve.

Your journey. Your family. Our specialty.

We're committed to providing exceptional care in a supportive and caring environment to help you achieve your family goals.

Integrated care

A connected team of doctors and specialists work together to build a treatment plan based on your needs and medical history.

High-quality medicine

With our expert urologists, reproductive endocrinologists, and infertility specialists, you'll get high-quality care and peace of mind at every phase of your journey.

Culturally responsive care team

Our care teams and staff are as diverse as the communities they serve, and foster a culture of inclusion to provide the culturally competent care you deserve.

Convenient locations

As a Southern California Kaiser Permanente member, you have access to 7 fertility centers throughout the area and multiple community IVF centers.

Choose from a range of fertility services

No matter how you envision your future – or choose to get there – your doctor will help you understand your options and find the right treatment for you.

We offer many services for covered members:

- IVF, including genetic testing and embryo storage
- IUI procedures
- Male fertility procedures
- Fertility preservation

Take the first step

For female fertility care, you can call your local fertility care location directly to schedule a consultation with a specialist. For male fertility care through the Urology Department, you'll need a referral from your personal doctor. Then the Urology Department will contact you to schedule a consultation.

Visit kp.org/scal/fertilitycare
for locations and more information.

Many Kaiser Permanente members have coverage for the diagnosis and treatment of infertility, and some members have coverage for in vitro fertilization (IVF) procedures if IVF is listed as a covered benefit in the *Evidence of Coverage* for their Kaiser Permanente health benefit plans.

Effective January 1, 2020, certain fertility preservation services are a covered benefit for some plans under California law. For these plans, when a covered treatment may directly or indirectly cause iatrogenic infertility, standard fertility preservation services are a covered service distinct from covered infertility treatment services. "Iatrogenic infertility" means infertility caused directly or indirectly by surgery, chemotherapy, radiation, or other medical treatment.

Clinical services are provided by providers or contractors of Southern California Permanente Medical Group, and Kaiser Foundation Hospitals may receive compensation for providing facilities and/or other support in connection with these services. For specific information about your covered health plan benefits, please see your *Evidence of Coverage*.
